#### Overview of the Permit Modification Notification

This document contains a Class 1 Permit Modification Notification (PMN) for the Waste Isolation Pilot Plant (WIPP) Hazardous Waste Facility Permit (Permit) Number NM4890139088-TSDF.

This PMN is being submitted by the U.S. Department of Energy (DOE) and Nuclear Waste Partnership LLC, collectively referred to as the Permittees, in accordance with Permit Part 1, Section 1.3.1. (20.4.1.900 New Mexico Administrative Code (NMAC) incorporating Title 40 of the Code of Federal Regulations (CFR) §270.42(a)). The PMN in this document is necessary to notify the New Mexico Environment Department (NMED) of changes which impacts the Permit. This change does not reduce the ability of the Permittees to provide continued protection to human health and the environment.

The requested modification to the Permit and any related supporting documents are provided in this PMN. The proposed modifications to the text of the Permit has been identified using red text and double underline and a strikeout font for deleted information. All direct quotations are indicated by italicized text.

#### **Basis**

The change is classified as an "administrative and informational change" and is, therefore, a Class 1 modification pursuant to 20.4.1.900 NMAC (incorporating 40 CFR §270.42, Appendix I, A.1).

#### **Discussion**

On July 26, 2019, Todd A. Shrader was replaced by Kirk D. Lachman as the Acting Manager and responsible official for the DOE, Carlsbad Field Office. The revisions to Attachment A, Section A-1, and Attachment B, reflect this change and is necessary as Mr. Lachman is the signatory authority for the DOE, Carlsbad Field Office. Attachment B was updated using the United States Environmental Protection Agency RCRA Hazardous Waste Part A Permit Application Instructions and Form, 8700-23 (OMB# 2050-0024; expires 5/31/2020).

The modification to update Attachment B, Appendix B1, provides the most current information regarding active environmental permits and approvals applicable to the Waste Isolation Pilot Plant as of August 2019. These changes are needed to update the Permit and to ensure completeness and accuracy of the list of other environmental permits.

#### 5. Nature of Business

| The Waste Isolation Pilot Plant (WIPP) is a U.S. Department of Energy facility which entails receiving. |
|---|
| unloading, and transferring radioactive mixed waste from the surface of the site to the underground     |
| hazardous waste management units. Waste is emplaced in an underground geologic repository horizon       |
| located in a deep-bedded salt formation approximately 2,150 feet beneath the surface.                   |

#### 8. Map

Attach to this application a topographical map, or other equivalent map, of the area extending to at least one mile beyond property boundaries. The map must show the outline of the facility, the location of each of its existing intake and discharge structures, each of its hazardous waste treatment, storage, or disposal facilities, and each well where it injects fluids underground. Include all spring, rivers, and other surface water bodies in this map area. See instructions for precise requirements.

#### 9. Fecility Drawing

All existing facilities must include a scale drawing of the facility. See instructions for more detail.

#### 10. Photographs

All existing facilities must include photographs (aerial or ground-level) that clearly delineate all existing structures; existing storage, treatment, and disposal areas; and sites of future storage, treatment, or disposal areas. See instructions for more detail.

#### RCRA PART A APPLICATION CERTIFICATION

The U.S. Department of Energy (DOE), through its Carlsbad Field Office, has signed as "owner and operator," and Nuclear Waste Partnership LLC, the Management and Operating Contractor (MOC), has signed this application for the permitted facility as "co-operator."

The DOE has determined that dual signatures best reflect the actual apportionment of Resource Conservation and Recovery Act (RCRA) responsibilities as follows:

The DOE's RCRA responsibilities are for policy, programmatic directives, funding and scheduling decisions, Waste Isolation Pilot Plant (WIPP) requirements of DOE generator sites, auditing, and oversight of all other parties engaged in work at the WIPP, as well as general oversight.

The MOC's RCRA responsibilities are for certain day-to-day operations (in accordance with general directions given by the DOE and in the Management and Operating Contract as part of its general oversight responsibility), including, but not limited to, the following: certain waste handling, monitoring, record keeping, certain data collection, reporting, technical advice, and contingency planning.

For purposes of the certification required by Title 20 of the New Mexico Administrative Code, Chapter 4, Part 1 (20.4.1 NMAC), Subpart IX, §270.11(d), the DOE's and the MOC's representatives certify, under penalty of law that this document and all attachments were prepared under their direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on their inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of their knowledge and belief, true, accurate, and complete for their respective areas of responsibility. We are aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
