

APPENDIX I

---

**APPENDIX I  
PHOSPHATES, NITRATES AND SULFATES**

Listed in this Appendix are the positive responses from the TRU waste generator/storage sites on the questions concerning the occurrence of greater than 1 weight percent phosphate, sulfate, and/or nitrate in their waste streams. The intent of the question was that it applied only to "solidified" waste streams. In some cases, the TRU waste sites answered the question for "debris" waste streams. In addition to those positive responses in Revision 2 data call, several sites provided negative responses indicating that these constituents do not occur in the waste in greater than 1 weight percent concentrations, but not necessarily for all waste streams from a site. A detailed listing of the negative responses can be found in the database. No response was received from INEL. Overall only seven sites responded to this question as listed below. Listed below are the sites that provided negative responses and the number of waste streams for each site:

TRU Waste Site	Number of Waste Streams with Negative Responses
BT	5
LA	5
MC	1
RF	16
TB	1
SR	45

**PHOSPHATES, NITRATES, SULFATES**

Site	TWBIR ID	Phosphates (wt%)	Nitrates (wt%)	Sulfates (wt%)
AL	AL-W005		5	
RF	MT0807		4	
RF	MT0001		8	
RF	MT0800		4	
BT	BT-T005			Unknown
