TRANSURANIC WASTE
DEFENSE DETERMINATION APPROVAL FORM

Date: February 17, 2006

TRU Waste Site: LANL for NA-21

Waste Stream ID: LA-08-NA-03

Waste Stream Name: Americium-241 and plutonium-238 sealed sources.

Waste Stream Description: Americium-241 and plutonium-238 sealed sources managed as waste from DOE sites.

Justification that this waste stream is defense: Radioactive materials in the sealed sources are activation or decay products of defense materials production, resulting from materials separations during defense nuclear material byproduct management, and are now managed for defense nuclear materials security and safeguards.

Defense Source (see 42 USC § 10101(3)): (B) weapons activities including defense inertial confinement fusion; (D) defense nuclear materials production; (E) defense nuclear waste and materials by-products management; (F) defense nuclear materials security and safeguards.
